Sustainable mobility | Electrified Mobility | Connected Mobility | IC powertrains

Reducing CO_2 and pollutant emissions, diversifying energy sources and incorporating the evolution in transport modes: these are the challenges associated with sustainable mobility for industry.

IFPEN channels its expertise into addressing this triple challenge, within the framework of the IFPEN Transports Energie Carnot Institute.

Its technological offer is structured around three complementary priority areas:

- Electrified Mobility
- Connected mobility
- IC powertrains

Sustainable mobility
