

IFP Training offers multidisciplinary training programs for working professionals lasting from a few days to a few months. Its offer includes conferences, simulations, practical workshops, case studies and training leading to professional qualifications.

Its extensive training program portfolio covers all disciplines, from geosciences, drilling and surface installations to refining, petrochemicals, petroleum products and engines. The training programs can be addressed to technicians, engineers or managers, and deal with technical or economic subjects.

As a subsidiary of IFPEN, IFP Training boasts around 100 permanent teaching staff, who, supported

by 600 part-time staff, lead more than 1,400 training sessions each year for an international audience of more than 15,500 technicians, engineers, managers and future leaders in the oil and gas, petrochemicals and powertrain industries.
