

INNOVATIVE SMES, START-UPS... BOOST YOUR DEVELOPMENT WITH IFPEN

Our strengths

Our **know-how and technical resources** for the development of industrial innovations

The **multidisciplinary skills** of our 1,600 employees specialized in R&D, legal, patent, market research, finance and business development

Our **international network**: subsidiaries, industrial partners, laboratories, investors

Our **flexibility** and **responsiveness**

...to benefit your project

To save **time** in your **development phase**

To **add value** to your **innovation**

To **mitigate** your **technical and financial risks**

We play an active role in a number of initiatives aimed at **supporting SMEs**, including:

- **the Carnot Institute network**, which facilitates partnerships between SMEs and public research players. IFPEN is labeled Carnot for its activities in the fields: *Transports Energie* and *Ressources énergétiques*
- **the SME pact**, aimed at encouraging closer ties between SMEs and large companies

Supporting SMEs in their R&D projects is one of IFPEN's missions: we have been doing so since 1989 and have already backed 400 companies, creating more than 1,200 jobs in the process.

Each year:

- 300 companies met
- 50 applications examined
- for 20 contracts signed / 3 jobs created on average

WOULD YOU LIKE TO MEET US TO PRESENT YOUR PROJECT?

A team made up of innovation experts is here to listen to your needs and support and guide you through your project!
