Wind Energy

23 - 25 November 2021

From 23 to 25 November, more than 7,000 participants and 300 speakers will gather in Copenhagen for the [WindEurope Electric City](#).

This is an opportunity for these players to present their global vision of the **development of wind energy in Europe** and their solutions, in a **European context of energy transition**.

IFPEN will present its [offer in terms of wind turbine control](#), including its real-time wind measurement system provided by LiDAR sensors.

Come and visit us on French Pavillon - Hall C3/Ilot B3.

Find more information about this event [here](#).
