02 - 05 June 2025

From June 2 to 5, 2025, the EAGE Annual 2025 will be held in Toulouse, bringing together researchers and professionals in the fields of energy, geosciences and engineering. This year's theme is: "Navigating change: Geosciences shaping a sustainable transition."

Come meet experts from the IFPEN Carnot Institute for Energy Resources and Beicip-Franlab to explore how research and innovation in the geosciences can address the challenges of the energy and ecological transition.

At the **IFPEN/Beicip-Franlab booth (no. 200)**, you will discover IFPEN's offerings related to decarbonization, geothermal energy, CCUS, hydrogen, and digital technologies—sectors and expertise in which IFPEN has developed innovative solutions as part of its mission to serve a decarbonized and sustainable world.
