16 - 22 June 2025

The [International International Paris Air Show](#) opens its doors from June 16 to 22, 2025. The general public and professionals are expected to attend in large numbers to explore innovations in the aeronautics and space sector.

Don't miss the opportunity to discover sustainable aviation fuels (SAF), which will be the subject of presentations and demonstrations in the "New Energies" area at the [Paris Air Lab](#).

IFPEN experts will use models and samples to explain the SAF production processes. Mystery boxes will give you a firsthand look at the diversity of resources being considered for large-scale production of these fuels. Come and discover how the fuels of the future can meet the needs of aviation while limiting their carbon footprint, and interact with the teams.
