IFPEN

**IFP Energies nouvelles (IFPEN) announces two new appointments:**

**Raphaël Huyghe has been appointed Director of the Energy Systems Business Unit**

A graduate of the École Centrale de Lyon and IFP School, Raphaël Huyghe, 50, has over 20 years'

experience in research and innovation (R&I) in the fields of processes, catalysis and sustainable chemistry.

He began his career at IFPEN in 2001 as a process engineer and then project manager, working in the fields of natural gas treatment, petrochemicals and biotechnologies. In 2010, he was appointed CEO of the Axelera competitiveness cluster.

Returning to IFPEN in 2011, he led large-scale R&I projects, including BioButterFly, a collaborative project with Michelin and Axens for the production of bio-based butadiene. As head of the Molecular Catalysis department from 2020, he focused his research on key themes in the energy and ecological transition, such as CO<sub>2</sub> recovery and plastics recycling.

In 2023, Raphaël Huyghe became Head of Programs at the Chemistry for Industry Business Unit. He drew up IFPEN's strategy for the development and deployment of decarbonization technologies for industry, and managed a portfolio of projects in the field of CO<sub>2</sub> capture, utilization and storage (CCUS).

### **Florence Delprat-Jannaud has been appointed Scientific Director**

Florence Delprat-Jannaud is a physicist who graduated from the Ecole normale supérieure de Cachan. She also holds a PhD in earth sciences from Paris Sud University (Paris XI).

She joined IFPEN in 1989 to pursue a career in geophysics, developing expertise in the field of seismic imaging. She also coordinated a variety of research projects, covering cross-cutting geoscientific fields, such as the geological storage of CO<sub>2</sub>.

Florence Delprat-Jannaud won the 2014 Etoiles de l'Europe award for the coordination of the European SiteChar project dedicated to the characterization of CO<sub>2</sub> storage sites.

In 2016, she led the Ile-de-France Geosciences Scientific Interest Group, an earth sciences and digital sciences research network dedicated to the fields of energy, resources and the environment.

In 2017, Florence Delprat-Jannaud was appointed Program Manager at the Energy Resources Business Unit, focusing on underground resources and usages for the energy transition, as well as CO2 capture and storage. Florence Delprat-Jannaud was also elected President of the CO2 Club in 2020.

In 2023, Florence Delprat-Jannaud was appointed Director of the Energy Products Business Unit. She was elected to the Académie des technologies (French Academy of Technologies) in 2024.

### **About IFPEN**

*IFPEN is the French national institute for research and training in the fields of energy, mobility and the environment. Its teams develop innovations for a low-carbon, sustainable world, covering the entire chain from scientific concepts through to technological solutions. From technologies and software to equipment and services, the institute's low-carbon innovations are paving the way for the transition and facilitating the emergence of the industrial sectors of the future. IFPEN boldly imagines and meticulously designs solutions for tomorrow's world. Find out more: [www.ifpenergiesnouvelles.fr/](http://www.ifpenergiesnouvelles.fr/)*
