- IFPEN

On Wednesday, September 24, Pierre-Franck CHEVET signed with Bernard Salah, Director of R&D at EDF, the renewal of the framework agreement between IFPEN and EDF, strengthening an already rich and diversified collaboration.

This partnership covers a wide range of solutions for the energy transition: e-fuels, offshore wind power, battery storage, CCS... combining scientific research with industrial development. A few concrete examples:

- **Provence Grand Large:** expertise in the design of floating structures
- **Take-Kair:** a project led by Hynamics and Axens, with support from IFPEN
- **COMUTES:** consortium on battery aging

- Joint work on foresight studies and industrial decarbonization

Together, EDF and IFPEN combine scientific expertise and innovation to accelerate the energy transition.

Renewal of the IFPEN/EDF framework agreement
