

Panorama of energies and transport technologies: definitions, challenges, markets, environmental footprint, outlook.

CLIMATE, ENVIRONMENT AND CIRCULAR ECONOMY

- CO₂ capture, utilization and storage
- Energy storage
- Critical metals and rare earths
- Plastic recycling
- Water cycle management
- Soil carbon sequestration

RENEWABLE ENERGIES

- Biofuels and e-fuels

- [Biogas and biomethane](#)
- [Bio-based chemistry](#)
- [Wind power](#)
- [Wave energy](#)
- [Geothermal](#)
- [Hydrogen](#)

TRANSPORT

- [Hybrid vehicles](#) (currently being updated)
- [Electric vehicles](#)
- *Connected and driverless vehicles* (currently being updated)
- [Internal combustion engines](#)

FOSSIL ENERGIES

- [Oil](#)
- [Natural gas](#)
