

IFPEN's expertise and skills are **key influence and appeal factors** when it comes to conducting open and collaborative research. Peer recognition in a **variety of fields**, reflected in the numerous, often prestigious **awards received** over the years, is thus essential.

AWARDS AND ACCOLADES OBTAINED IN 2026

Malika Boualleg, research engineer and project manager in the Catalysis, Biocatalysis and Separation division, received the DivCat "Applied Catalysis" award from the DIVCAT Catalysis Study Group (Catalysis Division of the SCF, French Chemical Society) for her work and innovations in heterogeneous catalysis (valued by the filing of numerous patents) and in the extraction of critical mineral resources.

Award-winning researchers:

2025 2024 2023 2022 2021 2020 2019 2018
 2017 2016 2015 2014 ??????Nobel Prize
