

RESPONSIBLE OIL AND GAS

| | | | | |
|-------------------------|-------|----------------|-----------------------------|---|
| Responsible oil and gas | Fuels | Petrochemicals | Gas treatment | Basins and reservoirs modeling and simulation |
| | | | Enhanced oil recovery (EOR) | Offshore drilling and production |
| | | | | |

Against the backdrop of the accelerating energy transition, the oil industry and related sectors need to continue to meet sustained demand, while significantly reducing their environmental footprint and energy consumption. IFPEN develops eco-efficient and flexible processes for the production of fuel and chemical intermediates meeting the strictest standards. To make better use of reserves, IFPEN also proposes increasingly efficient and cleaner, cutting-edge technologies for oil and gas exploration and production.
