

Climate, environment and circular economy | CO2 capture, utilization and storage | Plastics recycling | Environmental monitoring | Life cycle analysis (LCA) | Metal recycling

New R&I themes, stimulated by the energy transition and circular economy markets, are beginning to emerge. The multidisciplinarity of IFPEN's researchers is used in projects covering fields as diverse as CO_2 capture/storage and plastics recycling, addressing the problems of industry.

- CO_2 capture, utilization and storage
- Plastics recycling
- Sustainable water management
- Environmental monitoring
- Life cycle analysis (LCA)
- Metal recycling

Climate, environment and circular economy
