

Responsible oil and gas

Enhanced oil recovery (EOR)

ENHANCED OIL RECOVERY (EOR)

OUR NETWORKS

IFPEN has created **a community of 70 partners around a workshop dedicated to chemical EOR**. It brings together EOR managers from oil companies to discuss technical and industrial challenges associated with the implementation of EOR on the ground, technological advances and pilot project feedback.

By invitation, every two years, in the Paris region.

Join the community and explore the key factors governing the success of chemical EOR projects with your colleagues!
