Risers and flow lines

RISERS AND FLOW LINES

OUR NETWORKS

Within the context of the CorRTE_x (Corrosion Research and Technical Expertise) Alliance, IFPEN has forged a strong partnership with the [Institut de la Corrosion](#), the [École des Mines engineering school in Saint-Etienne](#), the [CNRS \(French National Center for Scientific Research\)](#), the [INSA Lyon \(National Institute of Applied Sciences\)](#), the [University Lyon 1](#), the [University of Lyon](#), and [MECM](#).

The consortium partners have invested in a joint facility: the corrosion test loop, hosted by the [Axel'One Innovative Processes Platform at Solaize](#).

The objective is to pool corrosion tools and expertise as part of an open innovation approach and address the innovation needs of industrial players and SMEs.
