

OUR STRENGTHS

Climate, environment and circular economy

Environmental monitoring

ENVIRONMENTAL MONITORING

OUR STRENGTHS

- Expertise derived from oil and gas exploration, production and storage applied to the development of new energy technologies based on the use of the underground environment.
- Scientific expertise recognized via publications enabling the dissemination of information and the scientific promotion of our R&I work.
- Turnkey methods, for rapid industrial deployment.
- Mature technologies, aimed at finalizing proofs of concept.
- Patents to transfer the activity to industry.
