

OUR STRENGTHS

Climate, environment and circular economy

Critical metals and rare earths

CRITICAL METALS AND RARE EARTHS OUR STRENGTHS

- Expertise in the field of the synthesis, characterization and implementation of **adsorbents**
- [The French Chemistry Society's Industrial Chemistry Division](#) awarded its 2016 prize to Malika Boualleg, an IFPEN researcher, in recognition of her work dedicated to the development of a selective lithium adsorbent.
- **Economic and geopolitical approach** complementary to technical and scientific expertise

IFPEN :
Decoding keys > Metals in the energy transition

CONTACTS

Abdelhakim Koudil

Program manager: "Conversion of residues and heavy crudes", "Biomass to chemicals", "Gas treatment and conversion", and "New technological markets"

abdelhakim.koudil@ifpen.fr

Jérôme Sabathier

Head Economics & Environmental Evaluation Department

jerome.sabathier@ifpen.fr
