

Responsible oil and gas | Fuels

FUELS
OUR STRENGTHS

- Recognized expertise in the field of catalysis
- Integration in a public-private partnership ecosystem via the Axel'One collaborative innovation platform
- The acceleration in product development thanks to IFPEN's high-throughput experimentation (HTE) units, making it possible to test several catalysts in a variety of operating conditions with different feeds.
- Axens, a dedicated subsidiary for the marketing of our technologies, within the framework of a long-term R&I partnership since 2001

THE IMPACT OF FUELS

IFPEN has expertise in fuel technologies (conventional and alternative) and combustion systems adapted to each fuel, enabling it to offer a comprehensive range of services, particularly the qualification of processes: economic and environmental impact, characteristics and functional properties for land, aviation and maritime applications.

CONTACTS

Antonio Pires Da Cruz
Program manager “Gasolines”
antonio.pires-da-cruz@ifpen.fr

Emmanuelle Guillon
Program manager "Conversion and Distillates"
emmanuelle.guillon@ifpen.fr
