

OUR STRENGTHS

BIO-BASED CHEMISTRY OUR STRENGTHS

Scientific and technical expertise stemming from process development, present throughout the bioproduct value chain:

- catalysis and biocatalysis,
- chemical engineering,
- process engineering,
- dimensioning and design of pilot units and demonstrators,
- analysis.

Two extrapolation pilot units at the [IFPEN-Lyon site](#).

A technical and economic evaluation approach integrating the environmental and [life-cycle analysis](#) dimension.

A proven transfer model

IFPEN's innovations are taken to market by its industrial partners, who handle industrial development and marketing. Its subsidiary [Axens](#) is one such example.
