With the support of the Total Foundation and in association with the Tuck Foundation, IFP School is launching the second edition of its **MOOC "[Energy Transition: innovation towards a low-carbon future](#)"** on **27 January 2020**.

Free and certified, this MOOC aims to raise awareness amongst students, future engineers and professionals of the challenges faced by the energy transition and the innovations in the low-carbon energy mix sector.

The online training lasts 5 weeks (ends on March 2nd, 2020) and courses will be taught in English. The MOOC addresses the following themes:

- the challenges faced by the energy transition in the 2°C scenario (demand, resources, environment, global warming, etc.) ;
- solutions for a sustainable energy mix: production of renewable electricity, geothermal power, the increasing use of natural gas, CO₂ capture and storage (CCS), energy storage, energy efficiency, bio-based

products, biofuels.

The first edition of this MOOC, launched in March 2019, was a success, with 26,000 participants from 130 countries and a certification rate of 20%.

This 2nd edition offers, thanks to the support of the Total Foundation in association with the Tuck Foundation, new versions in French and Spanish, handouts as well as mini-games for evaluation.

Seize this opportunity and register now!

Registrations are open until 21st February 2020.

2nd edition of the MOOC Energy Transition
